**Subject:** URGENT: FW: EAS Buyer Assignment Notification

Brian,

I'm sorry I've been calling you so much this morning about this PR, but we are now down to the last hour or two of funding on the Gold King Mine Spill TDD. If the additional funding is not communicated to the contractor soon, they will have to stop working. When we have had system issues in the past, Mike has informed the contractor of the situation via email and instructed them to increase the TO and TDD funding ceilings in accordance with a PDF of the PR or a contract mod that wouldn't transmit normally. So, if EAS is having issues, please ask Cora to communicate the increased funding ceiling to the contractor by email. Also, once the funding is mod'd onto TO1, it will need to be used to increase TDD # EP-W-06-042/1/WESTON-042-15-017. So, if Cora is going to communicate the increase by email, the email should state that the \$1.1M is for this TDD.

Thank you for your immediate attention.

Will LaBombard
